Habitat Codes (HC)

F - forests

S - subalpine forests/meadows

A - alpine areas

R - rivers

L - lakes/marshes

Abundance

Abundance is based on the number of individuals of a species a competent observer might expect to find in a single day in suitable habitat.

a - abundance: easily observed in habitat

c - common: high probability of observation

uc - uncommon: probability of observation low

0 - occasional: seldom observed

r - rare: zero to a low number observed annually

Nesting (N)

x indicates species known or believed to nest in Mount Rainier National Park

The names and order of species follow the American Ornithologist's Union Checklist (1983) and supplements through 1993. Please give a park ranger detailed descriptions of any observed species listed as occasional, rare, or not listed.
